

Hannan Customs

Description:

Founded in 2005, Hannan Customs fabricates Chopper bicycles with motorcycle flair. Each bike is handcrafted to your exact specifications. Anything is possible, seats, springer forks, headlight, we can even cut your own logo in the wheel, your imagination is the only limit.

The stainless steel frames are welded by hand and all the parts are custom crafted by us. Even the back wheel is designed and fabricated by Hannan Customs to make sure that it performs for this specific application. Everything on these bikes has been engineered to make sure that they not only look great, but that they are a functional human powered vehicle. A typical Hannan Chopper weighs in at only 90 pounds, despite the fact that it's 9 feet long. Now you can be cool and be environmentally friendly at the same time.

These Choppers open endless possibilities where conventional motorcycle cannot ride. These bikes can also be used to promote you or your business. Even though they are made to be ridden, you will never go unnoticed on one of our Choppers.

Contact us today to order your own Custom Chopper.
